THE HIDE MARKET

The hide market continues dull and featureless. Tanners are not inclined to do much buying, even at low prices, until they are able to dispose of the large stocks of leather still on hand.

THE EXPRESS RATES ON GREEN CATTLE HIDES ARE HIGHER and we suggest you inquire at your express office as to the charges before shipping. If the charges are too high to justify shipping only one or two hides, we suggest you wait until you have at least four or six hides and then ship. We want your hide shipments, but think it best that you send enough hides to justify paying the express charges and insuring yourself of some profit too.

SALT ALL GREEN HIDES WELL as soon as they are taken off and again BEFORE SHIPPING.

GREEN CATTLE HIDES		Per Pound	HORSE, MULE AND DRY HIDES		Each
Green Salt (No. 1).....	\$.07 to	.06 1/2	Green Horse or Mule No. 1.....	\$3.75 to	\$3.25

ROOTS, HERBS, BARKS AND LEAVES

GINSENG

Other Names: — Seng, Five Fingers, Red Berry.

The root has a thick, pale, yellowish, or brownish bark, commonly marked with wrinkles which transverse it. It has a slight aromatic odor, and a bitter sweet taste. The plant is from eight to fifteen inches high, bearing three leaves at the top, which consist of five thin, oval leaflets, pointed at the top and serrated at the base, the three upper ones being larger. The flowers are yellowish green and are produced in a cluster of six to twenty during July and August. Ginseng is rarely found wild in damp places or where stagnant water is near. It is, however, sometimes found very close to running water. Ginseng must not be confused with Wild Parsnip or Parsley which resemble the root somewhat, but the plant is very much different.

GOLDEN SEAL

Other names:—Yellow Root, Eye Root, Eye Balm, Jaundice Root, Indian Dye, Yellow Puccoon.

Golden Seal has a short, yellow root stalk, which sends up in the early Spring a hairy stem about a foot high, which seems to fork at the top, one branch bearing a large leaf, and the other a smaller one and a flower. A third leaf which is much smaller than the other two and sometimes, is sometimes produced. The leaves are prominently veined and are five to nine lobed. The flower is small and of a greenish white color, and appears on a short branch during April and May. This flower is of short duration, about five or six days, and is followed by a head of bright red berries, which, when ripe, contain a number of black shiny, hard seeds, from which the cultivated Seal is grown. Golden Seal grows best in open woodlands where there is good natural drainage, and an abundance of leaf mold.

BIG MONEY IN RAISING GINSENG AND GOLDEN SEAL

Ginseng and Golden Seal can be successfully cultivated from seed. Send for our book "Ginseng and Other Medicinal Plants," which tells how to grow and collect Ginseng, Golden Seal, and many other plants and roots of value. This book contains three hundred and sixty-seven pages and one hundred illustrations. Price, postpaid.....

\$1.25

HOW TO DRY AND PREPARE YOUR ROOTS FOR MARKET

All roots, herbs, barks and leaves should be absolutely dry before shipping. If they are packed and shipped green they are apt to heat or mold, and when received in this condition are of little value or worthless. Here is the correct way to prepare roots for the market:

First, wash the dirt from the roots thoroughly. To do this, spread them out on some clean surface and turn a hose on them, or stir them around in a tub of water for a few minutes. Do not let them soak up any more water than is absolutely necessary, because water-logged roots will not dry properly. After washing, spread the roots out loosely in some light, warm and dry place, turning them over every day or so until they are thoroughly dry. An attic or barn loft floor, provided there is a free circulation of air, is a good place to let the roots dry on. Be careful to see that they are not exposed to the direct rays of the sun, although there should be plenty of light. When in doubt about correct name of roots you have collected, before shipping send us a sample for examination and prompt report. We handle all roots of value but only quote those especially wanted. We are now paying the following prices for good average roots.

Per Lb.

Wild Ginseng—Northern.....	7.00 to	6.00
Wild Ginseng—Southern.....	6.50 to	5.50
Transplanted Ginseng.....	6.00 to	3.00
